

ABSTRACT

WA-VI-036

MASON-DIXON LINE: MILESTONE NO. ---(139)

Bellegrove, Maryland vicinity

Public/private

1767 (milestone, first set 1902)

1767 mound

Milestone No. ---(139) is an original milestone of 1767 brought from the vicinity of Clear Spring, Maryland, in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary and set into the center of a large mound of earth originally erected with a wood center post ^{in 1767} to mark a survey point along Mason and Dixon's 230.228-mile West Line, the boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The milestone is an embellished oolitic limestone post, quarried and carved in England. It is in fairly good condition, unaltered, measures about 11½ inches square and stands ^{firmly set} /about 15 inches above its concrete foundation within the earth mound, which is now quite small. The milestone is significant on the national and state levels primarily as one of 135 original Mason and Dixon monuments in the thematic group series of some 248 markers still defining the West Line. Locally, as one of 48 of these original monuments marking the present Washington/Franklin-Fulton county boundary (10 crownstones; 38 milestones; 1 of each in a mound), it is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(139) is an original milestone^{of 1767} brought from the vicinity of Clear Spring, Maryland, in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, and ^{center of the} set in the "Pile of Earth" originally erected by Mason and Dixon at this site, in 1767. The milestone is in fairly good condition, unaltered, stands about 15 inches high above its^{concrete} foundation within the mound of earth. The "Pile of Earth" as Mason and Dixon referred to the^{originally marked} cairns (with wood posts about 12 inches square^{and marked W on the west side}) was described by the Resurvey as a "large earth mound",^{and remains in good condition but is} now quite small, so is believed to have been altered, possibly^{in 1902} at the time of the setting of the stone into it.

The area here is rural, open^{sloping} farmed lands, along a ridge, sparsely settled, and surrounded by extensive woodlands^{mostly} along the many streams flowing into^{the winding} Sideling Hill Creek nearby. The site is within Election District 5 of Washington County, MD, and Union Township of Fulton County, PA; about 1½ miles northeast of the small scattered settlement of Bellegrove, MD; about ½ mile west of Bear Creek; about ¾ mile east of Sideling Hill Creek; about 700 feet southeast of the junction of the Hoopengardner's private drive with High Germany Road/LR-29001 and about 6 feet east of the drive when about 100 feet north of the farmhouse. It is in the center of the mound of earth covered with iris and weeds. It cannot be seen from the main road, but easily from the drive when closeby, all seasons,^{though the monument} and is protected by the Hoopengardners and being set above ground level, the mound is not.

The milestone, as with all original Mason and Dixon West Line monuments, is an oolitic limestone post with a low pyramidal top (now^{with} a large depression in the apex), quarried and carved in England, and originally measuring about 12 inches square by about 4 feet or more long, cut to stand about 3 feet high with the base left rough-cut for setting into the ground. The distinguishing embellishments are the vertical fluting with horizontally-fluted margins on all four sides, and the Roman capital letters P on the north side facing Pennsylvania and M on the south side facing Maryland, each V-sunk in the center of a plain, shallow circle panel near the top. Set in 1902 to its present height,^{it measures about 11½ inches square} all surfaces are extremely weathered; letters are clear but eroded (and M is chipped); fluting and margins are gone on the north and west sides, though some remain on the east and south sides; all edges and corners are chipped; and no planes or fluting remain on the top.

STATEMENT OF SIGNIFICANCE

Milestone No. ---(139) is significant on the national and state levels primarily as one of 135 original Mason and Dixon monuments in the thematic group series of some 248 markers still defining their 230.228-mile West Line, the boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The site was preliminarily surveyed in 1766, and "Pile of Earth" with a wood post in the center to mark the survey point set in 1767. In 1902, at the time of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, an original milestone of 1767 was brought from the vicinity of Clear Spring, Maryland, and set in the mound, replacing the post long since disappeared. Locally as one of 48 original monuments marking the present Washington/Franklin-Fulton county boundary (10 crownstones; 38 mile-stones), No. ---(139) is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these counties.
